

## Manufacturing Manager

Viltra is a leading Wastewater Treatment company that specializes in bespoke treatment plant solutions for commercial and domestic clients. Due to continued growth Viltra is recruiting for a Manufacturing Manager for its headquarters in Newry, Co. Down.

### GENERAL RESPONSIBILITIES:

You will lead our manufacturing department throughout the project manufacturing cycle, supporting various manufacturing stages of domestic and commercial, and wastewater utility projects. The successful candidate will work as an engineer in a team with other disciplines such as process engineers and mechanical engineers.

### KEY RESPONSIBILITIES:

- Act as the lead for all Health & Safety and Quality & Environmental aspects of the manufacturing process.
- Manage and develop the manufacturing team, systems, and processes.
- Previous experience using an MRP/ERP system in manufacturing and gaining benefits from such software.
- Oversee the stores department and ensure all component parts are available for builds, on time and in full.
- Communicate effectively to internal and external clients, both verbally & in writing.
- Record quality data and use this to drive improvements in supply chain and manufacturing.
- Structure & prioritise work effectively through close cooperation with the team, as a whole.
- Provide regular production reports to the board, demonstrating improvements in the supply chain, production output and quality.
- Drive manufacturing process improvements & projects when committing the company to an agreement.
- Assist with the development of monthly progress reports.
- Ability to work independently without losing initiative & focus.

### Essential Criteria

- 5 years' experience in a similar role.
- Experience leading and managing a team.
- Ability to read, understand and work to construction drawings and bills of materials.
- Proven experience of dealing with a sales team, customers, and suppliers.
- Logical Thinker with good analytical and problem – solving skills.
- Excellent time management and communication skills.

### Desirable Criteria

- Ideally a Lean/Six Sigma qualification and/or experience implementing improvements in a manufacturing facility.
- Project Management qualification.
- Engineering degree qualified.

To apply, please send your CV and a cover letter stating the job role you are applying for, to [jobs@viltro.co.uk](mailto:jobs@viltro.co.uk) by close of business on **Monday 15th January 2024**.
